GAS COMPRESSION

magazine

REOCCURRING COLUMNS, FEATURES, AND REPORTS

LNG RACE REPORT

The LNG Race Report is the go-to source for country-by-country updates on LNG projects – pending, planned, and in production. Monthly features also include updates on the specified country's energy policy, energy prices, and its energy market.

HYDROGEN REPORT

The growing hydrogen economy presents myriad opportunities for the gas compression industry. Each month, *Gas Compression Magazine* will have dedicated coverage of this important market segment.

ESG REVIEW

This quarterly supplement is devoted to the ways in which companies are coming together to make the gas compression industry sustainable over the long term, not just ideas and theories. Coverage on various products, strategies, technologies, and investments is intended to spark the collaboration and awareness needed for a sustainable future.

HAIGHT REPORT

The monthly op-ed from *Gas Compression Magazine's* publisher, Brent Haight, is one of the most popular pages of the magazine. Haight draws from his 20+ years of covering the gas compression industry to weigh in on issues that directly impact the global gas compression landscape – sometimes light-hearted, sometimes dire warnings, always a must read.

MERGERS & MARKETS

Senior Editor Daniel Foelber reports on the mergers, acquisitions, and boardroom maneuvers from companies operating within the gas compression space.

CONTRACTS & PERMITS

From initial application to final commissioning, this monthly report provides details on current construction projects that involve gas compression equipment, highlighting new equipment orders and project status updates.

RELIABLE COMPRESSION

Robert X. Perez, a mechanical engineer with more than 35+ years of rotating machinery experience, uses case studies and real-world examples to show best practices for achieving machinery reliability. His column appears every other month and is among the top read pages of the magazine.

WHAT WENT WRONG

W. Norm Shade pulls from his 40+ years of gas compression experience to examine equipment failures in the field and share the steps taken to return machinery to full service.
